## DIRECTIONS FOR APPLICATION

**FOR** 

## THE SPECIAL ADMISSION OF FOREIGN STUDENTS FOR ADMISSION IN APRIL • OCTOBER, 2023 (THREE-YEAR DOCTORAL COURSE)

The United Graduate School of Agricultural Sciences, Tottori University

The United Graduate School of Agricultural Sciences (UGSAS), Tottori University, was founded in 1989 offering an independent three-year Doctoral course. The UGSAS is organized on the bases of the three Master's Courses of Tottori, Shimane and Yamaguchi Universities, in the research facilities at the three universities. The UGSAS is operated in close alliance and cooperation with the Master's Courses of the three constituent Universities.

This graduate school aims to develop researchers and competent professionals who have the capabilities, in-depth knowledge, and advanced skills that enable them to pursue issues in agriculture and related fields, who can contribute to the development of science and technology and meet the demands of regional communities and international society. Our Graduate School seeks foreign students, (1) who have the basic knowledge and academic ability required in each major field of Bioproduction and Bioenvironmental Sciences, Bioresource and Life Sciences and Global Dryland Science; (2) who are motivated to acquire a higher level of expertise and skills and engage in original research by leveraging such expertise and skills; and (3) who are eager to contribute to the development of science and technology and the demands of regional and international communities.

#### 1. FIELDS OF STUDY AND NUMBER OF STUDENTS FOR ADMISSION

- (1) Fields of Study:
  - Applications for any field of Bioproduction and Bioenvironmental Sciences, Bioresource and Life Sciences and Global Dryland Science are accepted, provided that each applicant selects a suitable academic major supervisor at UGSAS.
- (2) Number of Students for admission:
  - A limited number of students funded privately or by the other sources (hereafter "Personal Funds").

### 2. QUALIFICATIONS

- (1) Nationality: Applicants with personal funds who are living outside of Japan at the time of application. Applicants should be nationals from countries which have a diplomatic relation with Japan.
- (2) Age: There is no age limitation for applicants with personal funds.
- (3) Academic career: Applicants should have or be expected to earn a master's degree by the end of March 2023 to enroll in classes in April 2023. Applicants should be expected to earn a master's degree by the end of September 2023 to enroll in classes in October 2023.
- (4) Health: Applicants should be in good mental and physical health.
- (5) Language proficiency: A good working level of English or Japanese is required.
- (6) Arrival in Japan: Successful applicants who wish to enroll in classes in April 2023 must arrive in Japan between April 1 and 7, 2023. Successful applicants who wish to enroll in classes in October 2023 must arrive in Japan between October 1 and 7, 2023.
- (7) Note:
  - (A) Applicants must have a recommendation from the dean of the faculty (or someone higher in position) of the university or institution.

(B) Applicants must be available for an interview with the members of the oral examination committee via videoconference or other means to take an oral examination.

### 3. APPLICATION FOR ADMISSION, EXAMINATION SCHEDULE, AND ADMISSION DECISIONS

|             | Deadline  | Remarks  |
|-------------|---|--|
| Application | Applicants who wish to enroll in classes in April 2023: | Submit the application through the desired major supervisor to the |
|             | June 1 (Tue.), 2022 - November 25 (Fri.), 2022          | UGSAS.   |
|             | Applicants who wish to enroll in classes in             |  |
|             | October 2023:   |  |
|             | June 1 (Wed.), 2022 – May 26 (Fri.), 2023               |  |
| Examination | An examination schedule (for an oral exam) will         | An oral exam will be conducted as                                  |
|             | be reported to the applicant through the                | specified in Section "5. Procedure                                 |
|             | prospective major supervisor within 30 days of          | for the Selection of Graduate                                      |
|             | the submission of the application.                      | Students."   |
|             | Applicants who wish to enroll in classes in April 2023: |  |
|             | An oral exam is scheduled sometime between              |  |
|             | July 1 (Fri.), 2022 and December 16 (Fri.), 2022.       |  |
|             | Applicants who wish to enroll in classes in             |  |
|             | October 2023:   |  |
|             | An oral exam is scheduled sometime between              |  |
|             | July 1 (Fri.), 2022 and June 30 (Fri.), 2023            |  |
| Admission   | Admission decisions will be reported to the             | Acceptance letters will be mailed                                  |
| Decisions   | applicant through the prospective major                 | to successful applicants.  |
|             | supervisor within 30 days of the oral exam.             |  |

#### 4. APPLICATION PROCEDURE

An applicant should submit the following documents through the desired major supervisor during an application period. Applications directly mailed to UGSAS are not accepted.

#### Documents:

- (1) Application Form (Use Form No. 1-2)
- (2) Photograph: One photograph (4 cm x 3 cm) should be pasted on the application form. Photograph should be taken from the front, from the chest up, bare-headed, and taken within the last three months.
- (3) Curriculum Vitae (Use Form No. 2)
- (4) A certificate for the master's degree or a certificate issued by the applicant's graduate school indicating that the applicant will be receiving or has received a master's degree by the end of March/ September 2023.
- (5) Evaluation: This evaluation must be written by the dean of the applicant's graduate school (Form No. 3 can be used).
- (6) Application Fee: 30,000 JPY (paid in cash).
- (7) Master's Thesis
  - (A) Applicants who have completed a master's course:
    - (a) A copy of the master's thesis, or published manuscript equivalent to the thesis.
    - (b) A summary of the master's thesis in English (about 1,200 words). Use A4 paper and attach a cover sheet (Form No. 5).
  - (B) Applicants who anticipate receiving a master's degree:
    - (a) Describe your research program in English (A4 size, about 5,000 words). This report may include tables and figures.
    - (b) A summary of the research program in English; details are the same as in ((A)-(b))

- (8) Research Proposal: Describe your research proposal (goal, objectives, experimental design). Use A4 paper and attach a cover sheet (Form No. 6)
- (9) Letter of Application: Describe why you chose our graduate course, and state your future goals. Use A4 paper and attach a cover sheet (Form No. 7)
- (10) Letter of Permission for Application (Use Form No. 8): If you are working for a public or private institution, arrange a letter of permission from your supervisor at your place of employment.
- (11) Copy of passport or Certificate of citizenship issued by the applicant's municipal authority.
- (12) Recommendation Letter from the President of the University or Dean of the Faculty.

#### Notes:

- ① These documents should be either typewritten or printed neatly in English or Japanese. Application forms can be downloaded from the Website (http://rendai.muses.tottori-u.ac.jp/english/recruit/index.html).
- ② Applications will not be accepted unless all documents are fully and correctly completed and delivered by the due dates.
- 3 None of the documents submitted will be returned to the applicants.
- Each applicant should select a professor as the prospective major supervisor and contact the professor when
   preparing the application documents. Any application without nominating a professor as the major supervisor
   will not be accepted.
- (5) The application fee is nonrefundable once paid.

### 5. PROCEDURE FOR THE SELECTION OF GRADUATE STUDENTS

- (1) Graduate students will be selected through a comprehensive evaluation of the oral examination, the documents submitted, and other elements.
- (2) During an interview for the oral exam conducted via videoconference, at least three members of the oral exam committee (who are one or more faculty members of each of the constituent universities and which include the prospective major supervisor) will spend about 50 minutes reviewing the master's thesis and the research proposal (roughly 30 minutes for the description of the Master's thesis and 20 minutes for questions and answers).
- (3) The method of the oral exam is subject to approval by the board of representatives following the submission of the Notice of the Method of the Oral Exam (Form No. 12) by the prospective major supervisor to the dean of the faculty.

#### 6. ADMISSION PROCEDURES, ETC.

- (1) Period of Admission Procedures:
  - (A) Successful applicants who wish to enroll in classes in April 2023 are expected to complete the procedures by the beginning of March 2023. They will be notified of the period at a later date.
    - (B) Successful applicants who wish to enroll in classes in October 2023 are expected to complete the procedures by the beginning of September 2023. They will be notified of the period at a later date.
- (2) Fees on entrance
  - (A) Admission fee: 282,000 JPY (proposed).
  - (B) Tuition: <u>267,900 JPY</u> (proposed) for the first semester (annually <u>535,800 JPY</u>). Tuition may be revised each school year.
  - (C) ①Personal accident insurance for students pursuing education and research (Hereafter "Gakkensai"): This insurance compensates for physical injuries suffered students in their intra-curricular activities both on and off

campus, and extra-curricular activities on campus. All students enrolled have to pay the premium of 2,600 yen for three years.

②Insurance for International Students (Type E): This insurance covers (1) Personal compensation responsibility: in case of causing injury to another person or damaging the property of others, (2) Rescuer expenses, etc.: compensate for the payment of transportation and accommodation expenses in case family members come to Japan to support the insured if he/she is hospitalized due to injury or illness for more than 3 days. (3) Movable property for daily use: in case of incurs a damage because his household goods are subject to fire or robbery in Japan. (4) Tenant Liability: in case of causing damage to a rented room due to an accident involving fire or water leakage in Japan. (Unlike "Gakkensai", there is no restriction on time and place) All International students enrolled have to pay the insurance premiums (3 years): 9,270 yen

### [Additional Benefits]

The National Health Insurance scheme is a fundamental part of Japan's medical care system. It is designed to cover a portion of the medical expenses incurred by citizens.

To apply for National Health Insurance, go to your local municipal government offices and follow the required procedures as instructed. After joining the scheme, you will only be responsible for paying 30% of any medical expenses you incur. (Exceptions apply in some cases.)

#### 7. EDUCATION

The successful applicants will be enrolled as full-time graduate students and under supervision and instruction in English or Japanese. Each student is supervised by faculty members of the three constituent Universities with a professor as a major supervisor and two professors as sub-supervisors. Although each student studies at a constituent University where the major supervisor resides, the student can use the training and research facilities at the other two constituent Universities.

## 8. NOTE

- (1) If false statements were made in the application dossiers, admission shall be rejected even after having been accepted by the United Graduate School.
- (2) With enrollment, new students are advised to become well informed about the Japanese climate, customs, manners, and other cultural aspects in general before coming to Japan. It is strongly advised that they study the Japanese language. Knowledge of the Japanese language is very helpful to newcomers to Japan.

## List of Major Supervisors and their Research Interests

The United Graduate School of Agricultural Sciences offers doctoral programs in the following three major courses: Bioproduction and Bioenvironmental Sciences; Bioresource and Life Sciences and Global Dryland Science. Each course contains one to four Divisions; and each Division offers basic and applied research programs. Faculty members (Professors and Associate Professors who serve as Major Supervisors) and their active research programs are listed below.

## 1. THE COURSE OF BIOPRODUCTION AND BIOENVIRONMENTAL SCIENCES

## (a) Division of Agricultural Production Science

| ARAKI Hideki (Y)        | Agronomy                                    | Function of plant production under environmental stresses and its agronomical application |
|-------------------------|---|---|
| OHTA Katsumi (S)        | Horticultural Plant Science                 | Studies on growth control in horticultural plants   |
| KOBAYASHI Nobuo (S)     | Horticultural Breeding                      | Evaluation of plant genetic resources and applications for breeding                       |
| TAKAHASHI Tadashi (Y)   | Crop Science                                | Establishment of low-cost and low-input crop cultivation systems                          |
| TAKEMURA Yoshihiro (T)  | Horticultural Science                       | Studies on the crop ecophysiology in horticultural crops                                  |
| TANAKA Hiroyuki (T)     | Plant Genetics                              | Genetic and breeding studies on improving quality of wheat flour                          |
| TSURUNAGA Yoko (S)      | Food Processing                             | Studies on manufacturing method and functionality in food processing                      |
| NAKATSUKA Akira (S)     | Molecular Breeding of<br>Horticultural Crop | Molecular breeding for agriculturally useful traits in horticulture crops                 |
| NONAMI Kazuyoshi (T)    | Agricultural Production<br>Engineering      | Mechanization of agricultural work  |
| MATSUMOTO Shingo (S)    | Biochemistry of Soil and Plant<br>Nutrition | Studies on the mechanism of plant nutrient acquisition in relation to soil fertility      |
| MATSUMOTO Toshikazu (S) | Fruit Science                               | Studies on fruit growing and processed food   |
| YANO Akira (S)          | Bioenvironmental Electrical<br>Engineering  | Application of electrical engineering to bioenvironmental technologies                    |
| YAMAMOTO Haruhiko (Y)   | Environmental Information<br>Science        | Growth diagnosis of plant canopies by optical measuring methods                           |

## (b) Division of Managerial Economics

| INOUE Norikazu (S)    | Farm Management                   | Farming practices and resource management on farm businesses              |
|-----------------------|-----------------------------------|---|
| TANEICHI Yutaka (Y)   | Agricultual Marketing             | Study on distribution of agricultural products and agricultural materials |
| TSUTSUI Kazunobu (T)  | Rural Geograph                    | Studies on regional economy and community development in Rural areas      |
| NOHMI Makoto (T)      | Rural Economics                   | Development and application of regional analysis methods                  |
| MATSUDA Toshinobu (T) | Economics of Consumer<br>Behavior | Empirical analysis of consumer behavior, especially food demand           |
| MATSUMURA Ichizen (T) | Farm Management                   | Studies on the relationship between farm management and rural society     |

| WAN Li (T)  | Marketing Information Analytics                       | Agricultural products distribution channels and econometric analysis of market information   |
|---|---|--|
| YASUNOBU Kumi (T)   | International Agricultural<br>Development Studies     | Agricultural and rural development in Southeast Asia   |
| (c) Division of Forest an   | d Watershed Environmental Sci                         | iences   |
| ISHII Masayuki (S)  | Regional Infrastructure<br>Engineering                | Development of designing method for renovation of irrigation facilities  |
| NAGAMATSU Dai (T)   | Plant Ecology   | Population dynamics of forest and grassland, vegetation science and biodiversity conservation.   |
| HIOKI Yoshiyuki (T)   | Conservation and Restoration<br>Planning of Ecosystem | Ecological planning and engineering for conservation and restoration of biodiversity   |
| FUJIMOTO Takaaki (T)  | Wood Physics  | Analysis of wood property variation, and development of measurement techniques   |
| (d) Division of Environme   |   |  |
| UENO Makoto (S)   | Plant Pathology                                       | Studies on the expression of resistance in plant-microbe   |
|   |   | interaction  |
| KAMINAKA Hironori (T)   | Plant-Microbe Interactions                            | Molecular mechanisms of immune response and mycorrhiza symbiosis in plants   |
| KAMINAKA Hironori (T)  KARASAWA Shigenori (T)                     | Plant-Microbe Interactions  Biodiversity              | Molecular mechanisms of immune response and mycorrhiza   |
|   |   | Molecular mechanisms of immune response and mycorrhiza symbiosis in plants   |
| KARASAWA Shigenori (T)  | Biodiversity  | Molecular mechanisms of immune response and mycorrhiza symbiosis in plants  Genetic diversity and species diversity of invertebrates   |
| KARASAWA Shigenori (T)  KIHARA Junichi (S)                        | Biodiversity Plant Pathology                          | Molecular mechanisms of immune response and mycorrhiza symbiosis in plants  Genetic diversity and species diversity of invertebrates  Photoresponces of the phytopathogenic fungi  |
| KARASAWA Shigenori (T)  KIHARA Junichi (S)  KODAMA Motoichiro (T) | Biodiversity  Plant Pathology  Plant Pathology        | Molecular mechanisms of immune response and mycorrhiza symbiosis in plants  Genetic diversity and species diversity of invertebrates  Photoresponces of the phytopathogenic fungi  Molecular mechanisms in plant-microbe interactions and plandisease resistance |

# 2. THE COURSE OF BIORESOURCE AND LIFE SCIENCES

# (a) Division of Fungus and Mushroom Sciences

| AIMI Tadanori (T)                         | Biochemical Technology of Microorganisms      | Biochemistry, molecular biology and biotechnology of microbial production  |
|---|---|--|
| SHIMOMURA Norihiro (T)                    | Mushroom Breeding and Cultivation             | Studies on breeding and cultivation of mushroom resources  |
| SOTOME Kozue (T)                          | Mushroom Phylogeny and Taxonomy               | Phylogenetic taxonomy of mushrooms, and ecological researches of wood-decaying basidiomycetes.   |
|   |   |  |
| (b) Division of Bioscience ARIMA Jiro (T) | ee and Biotechnology Bio-Functional Chemistry | Functional analysis of enzymes and microorganisms, and their   |
| • •                                       |   | Functional analysis of enzymes and microorganisms, and their application to industry  Biosynthesis pathway of antioxidants and metabolism of reactive oxygen species in photosynthetic organisms |

| KAWAMUKAI Makoto (S)   | Genetic Engineering  | Signal transduction, cell cycle control and biosynthesis of coenzyme Q in yeasts  |
|--|--|---|
| SHIOTSUKI Takahiro (S)   | Insect Chemical Biology and<br>Agrobio-Regulators                  | Chemical biology and molecular mechanisms in regulation of insect development and their applications  |
| NAKAGAWA Tsuyoshi (S)  | Plant Molecular Genetics   | Molecular mechanisms of plant development and technology for analysis of plant genes  |
| MATSUO Yasuhiro (S)  | Microbial Genetics   | Cell signaling and cell cycle control in fission yeast  |
| MANO Jun'ichi (Y)  | Mechanisms of Environmental<br>Stress-tolerance in Plants          | Elucidation and application of plant tolerance mechanisms against abitotic environmental stresses   |
| MARUTA Takanori (S)  | Plant Physiology   | Redox metabolism network and stress response in plants  |
| AZAKAMI Hiroyuki (Y)   |  |   |
| (c) Division of Applied B  | ioresource Chemistry   |   |
| AZAKAWII IIIIOyuki (1)   | Molecular Microbiology   | Molecular mechanisms of bacterial colonization to host surface  |
| ISHIHARA Atsushi (T)   | Molecular Microbiology  Natural Product Chemistry                  | Molecular mechanisms of bacterial colonization to host surface  Function, Biological activity, and Biosynthesis of metabolites produced by plants and microorganisms  |
| •  |  | Function, Biological activity, and Biosynthesis of metabolites  |
| ISHIHARA Atsushi (T)   | Natural Product Chemistry  | Function, Biological activity, and Biosynthesis of metabolites produced by plants and microorganisms  The molecular design and functional analysis of bioactive   |
| ISHIHARA Atsushi (T) ICHIYANAGI Tsuyoshi (T)                     | Natural Product Chemistry  Organic Chemistry                       | Function, Biological activity, and Biosynthesis of metabolites produced by plants and microorganisms  The molecular design and functional analysis of bioactive compounds  Regulation of diapause, metabolism and longevity corresponding to the growth environment   |
| ISHIHARA Atsushi (T) ICHIYANAGI Tsuyoshi (T) KAWANO Tsuyoshi (T) | Natural Product Chemistry  Organic Chemistry  Bioorganic Chemistry | Function, Biological activity, and Biosynthesis of metabolites produced by plants and microorganisms  The molecular design and functional analysis of bioactive compounds  Regulation of diapause, metabolism and longevity corresponding to the growth environment  Study on the relationship between food-derived bacterial metabolites or cyanobacteria-derived toxins, and pathogenesis |

## 3. THE COURSE OF GLOBAL DRYLAND SCIENCE

Bio-molecular Spectroscopy

**Nutritional Science** 

Food Science

## (a) Division of Global Dryland Science

YABUTA Yukinori (T)

YAMAMOTO Tatsuyuki (S)

WATANABE Fumio (T)

| AKASHI Kinya (T)              | Molecular and Cellular Biology           | Molecular responses of drought-tolerant plants and their application to molecular breeding      |
|-------------------------------|--|---|
| AYEHU Nigussie Haregeweyn (T) | Land Management                          | Watershed processes monitoring, modeling and management   |
| AN Ping (T)                   | Plant Eco-Physiology                     | Physiological responses and relative mechanisms of plants and plant ecophysiology in dry lands. |
| ICHINOHE Toshiyoshi (S)       | Livestock Feeding                        | Evaluation of ruminants production system   |
| INOSAKO Koji (T)              | Soil and Water Management                | Conservation, restoration and sustainable use of soil and water environment                     |
| IBARAKI Yasuomi (Y)           | Bio-environmental Control<br>Engineering | Environmental control in plant production   |

Studies on the function of antioxidant vitamins and oxidative stress response

Spectroscopic studies on life science and medical applications

Chemistry and nutrition of vitamin B12 and related compounds in food

| ENDO Tsuneyoshi (T)              | Soil Chemistry                                    | Influence of soil properties and irrigation water quality on soil salinization/sodication in irrigated farmlands of arid regions |
|----------------------------------|---|--|
| OGATA Hidehiko (T)               | Irrigation and Drainage Facilities<br>Engineering | Evaluation of construction materials and structural performance of irrigation and drainage structures                            |
| KINUGASA Toshihiko (T)           | Dryland Restoration and<br>Conservation Ecology   | Ecology and ecophysiology of plants in arid and semi-arid grasslands   |
| KIMURA Reiji (T)                 | Boundary Layer Meteorology                        | Heat and water balance in arid lands   |
| KUROSAKI Yasunori (T)            | Dryland Climatology                               | Climate change and variability, wind erosion, dust emission in drylands, and impacts of aeolian dust on climate                  |
| SHIMIZU Katsuyuki (T)            | Water Use and Management                          | Monitoring and assessment of irrigation water management   |
| SUZUKI Kenji (Y)                 | Meteorology                                       | Observational study on precipitation mechanisms and development of instruments for hydrometeor measurements                      |
| TANIGUCHI Takeshi (T)            | Microbial Ecology                                 | Soil and root microbial ecology and the application  |
| TSUJIMOTO Hisashi (T)            | Molecular Breeding                                | Breeding of drought tolerant crop lines by gene and chromosome engineering   |
| TSUNEKAWA Atsushi (T)            | Conservation Informatics                          | Monitoring and modeling of plant production and ecosystem change in drylands   |
